Отличный сеттинг и основной сюжет. Интересно просто выслеживать и охотиться на роботов (какое-то время). Сайд-квесты не получались совсем, вернее получались как обычно (принеси 10 шкур), но их благо можно скипать без последствий.

The DLC is amazing, the environment is stunning as always. My overall rate is absolutely recommend, but I'd like to cite some drawbacks. First, I didn't like the new ambush-style quests, there are just too many machines you have to kill. Second, Frostclaw and Fireclaw. While the first can be fun, the latter is overpowered even for a high-level character and weapons a fight can take up to half an hour, and this I...

Meh

I'll leave describing the good parts to the others. Absolutely primitive quests ruined this game for me. They are so silly that killed any motivation for me to progress in the game. Yeah, the battle system is great, but it is a story driven game and what's the point if that story is presented in such archaic way. Oh, and current generation open world games bored me long time ago, we saw all these system...

### Monument Valley 2

Generally it's on par with the excellent quality of the original. The levels are smaller and the puzzles are a bit simpler. But may be this is due to the fact that all the perspective mind hacks were revealed in the first game. Later in the game there are absolutely brilliant levels with "nature and light" theme. These are so great that I believe the whole...

### Uncharted 4: A Thief's End

First of all, let me be clear. You can't not recommend an Uncharted series game. This one is as great as all the previous entries. Story, graphics, treasure hunting, scenery - all is top notch. But somehow after playing for 5-6 hours I got bored and dropped it. Basically since the Uncharted 2 you are playing exactly the same game and I simply...
